

NASA Wallops Flight Facility
Workforce Development Summer Opportunity
Performance Period: June 1 – August 7, 2026 (some flexibility in dates)
<https://vsgc.odu.edu/>

Description: Join the NASA Wallops Workforce Development Team for Summer 2026!

Virginia Space Grant Consortium (VSGC) is seeking a pre-service educator interested in a career in middle or high school STEM education. The opportunity would also be great experience for a student interested in science communication, public affairs, or related fields. The position is open to community college and undergraduate students attending any school in Virginia.

The student will participate in an authentic STEM experience with Wallops Flight Facility's launch platforms, project support offices, and aerospace partners. The project will enable the educator to better understand the local interdisciplinary technical career opportunities available. This immersive experience will demonstrate how the workforce works across teams to plan and execute missions.

The participant will work collaboratively with the Wallops Workforce Development Team and VSGC program coordinators and support staff, as well as help facilitate other events and programs onsite. The educator will support the programs during all phases, including pre-implementation actions, logistics, management, and close-out of activities and events, including the three week-long [Virginia Space Coast Scholars Academies](#) at WFF.

The goals of the project are to construct a critical link between education and help students to realize their potential, strengthen current 21st Century workplace skills, and to engage and inspire the next generation of scientists, engineers, and professionals.

Preferred Majors: Education, STEM, General Science and Technology

Skills: Communication, Microsoft Office Suite
